Location: Bangalore, Karnataka

---

### Professional Summary

Full Stack Developer with a strong focus on the MERN stack and extensive experience in developing and managing robust web applications. Skilled in Data Structures and Algorithms, with a passion for problem-solving and efficient coding practices. Proficient in a wide range of technologies including TypeScript, Next.js, AWS DevOps, and database management systems like MongoDB and PostgreSQL. Collaborative team player with hands-on project management experience, skilled in using Git and GitHub for version control and CI/CD pipeline setup.

---

### Technical Skills

- **Languages:** HTML, CSS, JavaScript, TypeScript, C, C++, Python, SQL
  - **Frontend:** React.js, Next.js, Recoil, Tailwind CSS
  - **Backend:** Node.js, Express.js, AWS DevOps
  - **Databases:** MongoDB, PostgreSQL (Neon DB)
  - **Version Control:** Git, GitHub
  - **Tools & Platforms:** AWS, Docker, Discord for team collaboration
  - **Other Skills:** Problem Solving, Data Structures and Algorithms (DSA), Project Management, RESTful API Development
- 

### Certifications

- **0-1 Full Stack Development Certificate**  
*100xDevs, Cohort 2*  
Completed a comprehensive program covering full stack development with a focus on MERN technologies, TypeScript, and AWS DevOps. The program emphasized real-world applications and hands-on experience in building scalable, high-performance web applications.
- **Infosys Spring Board Certification on Linux**  
Gained a foundational understanding of Linux operating systems, including installation, configuration, and management of Linux environments. Learned the essential commands and tools required for effective system administration.
- **Infosys Spring Board Certification on Linux Shell Scripting Solutions**  
Developed skills in writing and executing shell scripts for automation tasks in Linux. Focused on problem-solving using shell scripting to streamline and automate processes, improving efficiency in various IT operations.

- **Infosys Spring Board Certification on Linux Bash Scripting Training**

Acquired expertise in Bash scripting, covering advanced topics such as scripting for system monitoring, network configurations, and performance tuning. Emphasized writing robust and reusable scripts for complex tasks.

---

## Professional Experience

### Full Stack Developer

*Self-employed* | Bangalore, India | 2024 – Present

- Developed and maintained web applications using the MERN stack.
  - Worked on a project management website named 'Krsna Khadan' focusing on backend structure using Express.js and PostgreSQL.
  - Documented project setup and deployment instructions in README.md files for seamless onboarding and collaboration.
  - Led a six-member team in a collaborative project, facilitating communication and coordination using a custom Discord server.
  - Designed and implemented custom software solutions for clients, emphasizing efficient, scalable code and user-friendly design.
- 

## Projects

### Simplified Jira Application

- Built a simplified version of Atlassian's Jira using the MERN stack.
- Implemented features like task management, user authentication, and role-based access control.
- Focused on intuitive UI/UX design and seamless navigation transitions using React.js and Next.js.

### Portfolio Website

- Created a personal portfolio website using Next.js and TypeScript.
  - Implemented smooth page transition effects for an enhanced user experience.
  - Showcased a range of development projects, highlighting technical skills and professional achievements.
- 

## Education

- **B. Tech in Computer Science Engineering (CSE)**  
Dayananda Sagar University  
2022 – 2026

- **Full Stack Developer Certification**  
100xDevs  
2023 – 2024
  - **Secondary Education (12th)**  
Presidency PU College  
2020 – 2022
  - **Primary Education (10th)**  
Sindhi High School  
2007 – 2020
- 

### **Personal Projects & Interests**

- Enthusiastic about continuous learning and improving coding skills, particularly in Data Structures and Algorithms (DSA).
  - Actively contributes to open-source projects on GitHub.
  - Enjoys participating in coding challenges and hackathons to solve complex problems creatively.
- 

### **Professional Development**

- Currently expanding knowledge in AWS DevOps, focusing on cloud architecture, deployment, and automation.
  - Regularly participates in webinars and online courses to stay updated with the latest industry trends and best practices.
-
